Dr. H. Orin Halvorson  
Department of Biochemistry  
University of Minnesota  
St. Paul, Minnesota

Dear Dr. Halvorson:

I am sending you the only information I have been able to obtain on the incidence of disease among American Peace Corp Volunteers. The enclosed reprint was finally sent to this office last week by Dr. Ralph Morris, Director Medical Programs Division, Peace Corp.

On further consultation Dr. Morris informed me that this was the only data of this nature readily available, but that if your panel had any other specific questions he would attempt to obtain the answers.

Because of the delay in obtaining this information I am also forwarding directly to each member of Panel 23 a copy of this reprint as well as the enclosed newspaper clipping which I thought might be of interest.

With best regards,

Sincerely,

Laura H. Greene, Ph.D.  
Professional Associate
